OBJECTIVE

Aspiring MERN Stack Backend Developer with a strong foundation in server-side programming, database management, and RESTful API development. Proficient in building scalable, secure, and efficient backend systems using MongoDB, Express.js, Node.js and integrating seamlessly with React-based frontends. Passionate about optimizing performance, ensuring data security, and driving the backend architecture of innovative applications. Eager to contribute to dynamic development teams and deliver robust solutions.

EDUCATION

Bachelor of Technology, Acropolis Institute of Technology and Research Indore   Expected 2025
Relevant Coursework: DBMS, OOPS.

EXPERIENCE

MERN Developer | InstaMD Technology Pvt. Ltd. | Live

- Developed and maintained features for an event management platform, including an admin panel and responsive ExpertOnBoard website.

- Collaborated with the team to design and implement several RESTful APIs using Node.js, Express, and MongoDB.

- Contributed to frontend components using React.js to ensure seamless user experience.

PROJECTS

SwiftCart | Live
- SwiftCart, built with the MERN stack, offers Google login, PayPal checkout, order tracking, and newsletter subscriptions. It ensures a smooth and secure shopping journey from browsing to payment.
- The admin panel provides complete control over products, users, and orders.
  Admins can add, update, or remove content and monitor platform activity in real-time.
- Users can search, add items to cart, and track orders effortlessly. The responsive design ensures a seamless experience across all devices.

CuraSync | Live
- Built a responsive healthcare app for patients to search doctors, book appointments, and access medical records using React, Node.js, Express, and MongoDB.
- Integrated secure JWT-based authentication, Razorpay for online payment of consultations, and Jitsi Meet for video calling between patients and doctors.
- Focused on delivering a fast, user-friendly, and convenient experience for travelers.

GharAngan |Live
- Developed a full-stack real estate platform using MERN stack, enabling users to list, search, and manage properties for rent or sale with an interactive UI.
- Integrated Firebase for image storage and Google OAuth for secure authentication, enhancing user experience and ensuring data security.

SKILLS

Programming Language	C++, Python, JavaScript
Frameworks	Node.JS, React.JS
Databases	MySQL, MongoDB
Tools	Git, GitHub, Firebase,Razorpay,JitSi
